

***Project Description
STP-9336(1) Rockdale
PI # 752270***

The existing roadway corridor begins at Green Street and runs eastward along Old Covington Highway and stops just west of SR 20/SR 138. Old Covington Highway then begins again on the east side of SR 20/SR 138. This roadway is currently two lanes and the area is primarily residential but is trending toward commercial uses.

The objective of this project is to reconnect Old Covington Highway by extending it under SR 20/SR 138. A bridge overpass will be constructed as part of the SR 20/SR 138 widening, project NH-035-1(32). The Old Covington Highway project will begin at Green Street and continue eastward under SR 20/SR 138 and connect with the existing Old Covington Highway on the east side of SR 20/SR 138. The proposed typical section will consist of two 11-foot lanes one in each direction, with a 12-foot two-way left turn lane in the center. The 16-foot shoulders will consist of curb and gutter, 5-foot grass strip and 5-foot sidewalk. Landscaping and street lights are proposed as part of this project along the shoulders. The existing connector road between Old Covington Highway and Dogwood Drive on the west side will be removed as part of this project.
